- Beadstrom™ chain nose pliers – 201P-011
- Beadstrom™ round nose pliers - 201P-014
- Italian Flush Cutter- 202E-001

• Designed by Fernando DaSilva •

• Instructions •

1. Using the small silver plated Quick Links connector, connect each end of the small silver plated Quick Links oval ring to the medium gold plated Quick Links round ring. Make 9 of these components.
2. Connect one of the components made in step one using 2 medium sp Quick Links connectors, one on each side of the small connector, to another medium gold plated Quick Links ring. Continue this connection process until all 10 of the medium gold plated Quick Links rings are connected.
3. Find the center of necklace, this will be one of the components made in step 1. Open the eye on an eye pin and attach between the two connectors on the medium gold plated Quick Links connector on the first open link from the center and close with the chain nose pliers.
4. String onto the eye pin 1 bead bumper, one of the fuchsia round crystal, then another bead bumper. Carefully form a loop on the end of the eye pin with the round nose pliers in the correct place to allow for the newly formed loop to attach across the Quick Links connector in-between the two connectors on the opposite side. Carefully cut the excess eye pin and close the loop.
5. Move to the next vacant Quick Links ring and repeat step 4 using a light rose crystal bead.
6. Move to the third vacant quick link ring again repeating step 4 using one crystal AB bead.
7. Repeat these steps on the opposite side of the necklace.
8. Connect one of the EZ-Lobster clasps directly onto one end of the necklace using the "finger" and carefully close it with the chain nose pliers. Repeat this step on the other side. Open one of the EZ-Lobster clasps and insert one small SP Quick Links connectors and repeat connecting the "finger" of another EZ-Lobster clasp to the small oval Quick Links ring. Continue until all of the EZ-Lobster clasps and small oval Quick Links rings are connected.
9. String the remaining fuchsia crystal bead onto the round head pin, use the round nose pliers to create a loop, then attach to the last link of the oval ring and EZ-Lobster chain and wrap the end of the wire around the wire until used then cut excess.
