- Beadstrom flush cutters – 202P-015

• Designed By Fernando DaSilva •

• Instructions •

1. Open a jump ring and attach a 2" piece of the medium figaro chain and then to a crystal AB donut; open last link of chain and slide into clasp and then set aside;
2. Open another jump ring and attach to a 6" of medium figaro chain final link and repeat the same on the opposite end, finishing with crystal donuts on both ends of chain;
3. Start attaching with help of jump rings each style of chain, following your preference; attach to both donuts from step1 and 2. This is the structure of this necklace. Start from the shorter to the longer chain length; maintain a average of ½" or 1" from one to another and keep in mind that the shorter one will set the sizing of the others;
4. To be able to nestle the chains nicely keep a consistency sequence of style; the design shown here features from its center top to the bottom the following sequence: box chain, small figaro, rolo chain, elongated cable and small cable.
