

SLIDING MACRAME BRACELET

By: Meredith Roddy

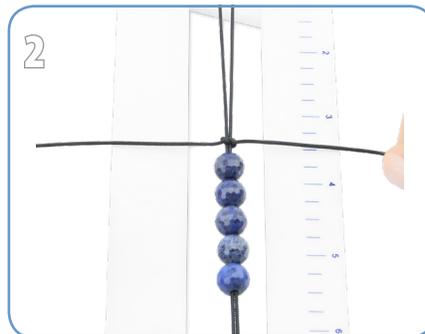

Materials

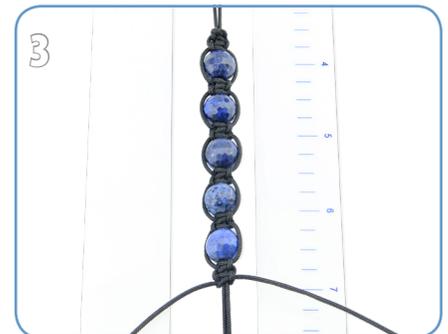

- 129U-010 - [Polyester Braided Cord](#)
- 211F-100 [WildFire Cord Cutter](#)
- 216S-210 - [Tying Station](#)
- 9 large holed beads

1. Double a 30" piece of Poly Cord around the top peg of the Tying Station. Thread 5 large holed beads onto both of the cords and secure them in the bottom plate.

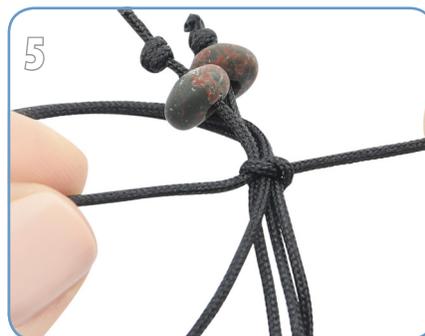

2. Double the remaining Poly Cord and knot it in the center to the top of the doubled cord at the 3.5" mark.

3. Tie 4 square macrame knots (right over left - left over right) then push a bead up into place against the last knot. Continue to tie 4 knots between each bead until all beads are captured. End with 4 macrame knots.

4. Trim and seal the ends of the knotted Cord with the WildFire Cord Cutter. Size the bracelet to fit your wrist when it slides open. On each loose cord, add a large holed bead, and capture it with a knot.

5. Line the two sides up facing opposite ways and tie them together using one of the scraps of Cord. Tie about 10 macrame knots to secure into place.

6. Trim and seal the ends with the WildFire Cord Cutter.
