

## DESIGN WORKSHOP

### WIRE SHAMBALLA BRACELET

By: Meredith Roddy

### Materials

- JW17S-15FT 5 Feet Plus 16" of .024 Silver Color Beadalon Beading Wire
- JFCT4S-1.5G (3) Size 4 Crimp Tubes
- 349B-024 (3) 6mm Crimp Covers
- (8) 10mm Beads
- (1) Button or Bead for the Clasp
- Clipboard

1. String one size 4 crimp tube on the short .024 wire. Make a loop big enough to fit over your clasp and crimp it in place.
2. Snip the short end and cover the crimp with a crimp cover.
3. Clip the loop under the clip board.
4. String the 8 beads onto the beading wire.
5. Clip the end of the wire to the bottom of the clipboard.
6. Take the long .024 wire and center it underneath the clipped down wire.
7. Tie an overhand knot by taking the right side of the long wire over the short wire and under your left wire and around and up through the loop.
8. Start the first knot by taking the right side of the long wire over the short wire, and under the left side, and taking the left side of the wire under the center wire and through the loop of the right wire. Finish the knot by taking the left wire under the right side, and taking the right side of the wire under the center wire and through the loop of the left wire.

9. Repeat Step 8 3 times then push up the first bead.
10. Tie another knot under your bead by following step 8 again.
11. Repeat step 8 3 more times.
12. Push up another bead.
13. Continue tying knots and pushing up beads until you reach the end of your bracelet, ending with 4 knots. (You may have to add another bead, or adjust your knot count to fit your wrist.)
14. String the crimp tube onto the end of the short wire and feed the long wires through as well. Crimp the crimp tube, cut the excess long wires, but leave the short wire.
15. Attach the button by stringing another crimp tube and the button. Go back through the crimp tube and crimp.
16. Cover both crimp tubes with crimp covers.
