STEP 1
Print nail template outline to the desired size. See next page for template.

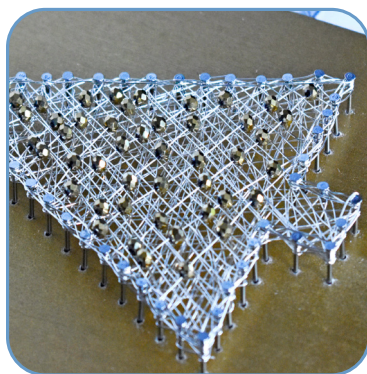

Paint wood panel and let dry.

STEP 2

Place image centered on wood slice and hammer nails along the template. A long nose pliers is useful to hold the nails in place.

*Tip: Place a bead mat or towel under the surface to help reduce noise when hammering.

STEP 3

Carefully remove paper outline when finished. Wrap end of wire around nail and begin to fill the shape.

Weave wire in between nails and outline the shape to form a border.

STEP 4

Cut a separate piece of wire (about 2ft., and wrap one end of wire to the nail. String on beads. Spread beads along the tree shape as desired.
